

# Silk Screens

In Puerto Rico, the silk-screen posters are known to advertise movies, songs, exhibitions, and festivals around the country. The most known was the group of artists that developed from the 60's until the 90's the "collection" of masterpieces under the Division de Educacion de la Comunidad. Outside of this department-studio many Puerto Rican artists designed posters to advertise festivals, exhibits, and so much more. A new generation of artists in Puerto Rico, continues this tradition.
